

HOW TO SET UP SPROUTSCONFIG WALLET:

1. Go to <https://sproutsclassic.com/> and scroll down until you see the the Sprouts Classic Wallet.
2. Click on the Windows logo and download the wallet the file on the download button
3. Unzip the package.
4. Now you see the Sproutsclassic.exe file. Double click it to start the wallet. The wallet will now create the files and folders it needs. When wallet is running, close it again.
5. Go back to <https://sproutsclassic.com/> and click on the template bootstrap and download the latest version. This may take a while and is depending on your internet speed.
6. Navigate to C:\Users\AppData\Roaming\Sprouts The user map you are using\AppData\Roaming.
7. Copy the contents from the downloaded bootstrap to the Sprouts folder and unzip it there
8. Right click in the map and select new > Text document (.txt file)
9. Now we will create a sprouts.conf file

TIP: Needing more nodes? Try or FAQ page on <https://sproutsclassic.com/faq/faq.html>

12: In the top left corner, select File -> Save as. In the window that opens, select All files instead of Text document and name it sprouts.conf. Then click save.

13: The folder will now look like this:

14. You are now ready to start the wallet again, start it and let it synchronise. Now the wallet is ready to use.

TIP: Add the SproutsClassic.exe to your In- and Outbound Firewall rules if needed

Let's Stake to a new Green world
